The Question and Answer Forum

3. *Recently I had a request to comply to **BS729**. Are we capable of accommodating that request?*

Yes you are. **BS729** is the British equivalent of **ASTM A123**. If you comply to all the requirements of **A123**, you will meet the requirements for **BS729**. This calls for equal or lighter coating weights. It is possible that you may be asked the same question about **ISO1461**. Again, complying with **A123** will meet or exceed the requirements.
