About Jordan River Galvanizing:

Jordan River Galvanizing offers the latest in galvanizing technology accompanied by a staff of professionals with excess of over 100 years of galvanizing expertise. With a galvanizing kettle of 5' wide by 7' deep and 30' long we are capable of processing/spinning the smallest of bolts and dipping up to 55' structural sections weighing in excess of 18,000 lbs. We are members of the American Galvanizing Association, Utah Steel Fabricators Association, Rocky Mountain Steel Association and also the Pacific Northwest Steel Association. We pride ourselves in excellent quality, quick material turn around, great customer services and competitive prices.
